

# CHATEAU VALANCE

## Installation Instructions

### Valance Installation (inside mount blinds only)

1. Before placing headrail in window frame, attach the valance clips to the headrail.
2. Avoid placing valance clips in front of large moving parts in headrail. (SEE ILLUSTRATION A)

3. Make sure the valance clips on the front of the headrail are in line with the mounting strips on the back of the valance. If not, reposition the clips by sliding them along the headrail.
4. Install blind in the mounting brackets as outlined in the installation instructions.
5. Attach valance to valance clips, starting from the center of the Headrail. Snap the valance into the plastic valance clips, working toward one end of the Headrail. Finish one side, then work from the middle toward the other end of the Headrail to finish the other side.

## Valance Return Assembly (outside mount blinds only)

1. Apply a thin coat of glue to the mitered end of both the valance and the valance returns.

**CAUTION:** Do not get glue on the stained surface of the valance. Avoid contact with skin.

2. Join the ends of the valance return with the valance by pressing the mitered edges together firmly for 60 seconds.
3. Repeat this procedure for the other end of the valance.
4. Allow the glue to dry for at least 10 minutes before installing the valance.
5. Repeat steps 1-5 listed above.
